

KAIVAC® 1750 WITH MISTER

CLEAN & DISINFECT WITH ONE ALL-PURPOSE MACHINE

The KaiVac 1750 with Mister is an all-in-one high-performance cleaning and disinfecting system. This enhanced No-Touch Cleaning® model includes all of the features and functions of the industry-leading KaiVac 1750 but also incorporates a complete misting system powered by a whisper-quiet 130 PSI battery-powered pump. It also includes a separate solution tank for ready to use disinfectants or cleaning solutions, a 50-foot (15.2 m) spray line, and a dual-nozzle misting gun.

The Kaivac misting system is an extremely effective and productive way to disperse pre-mixed EPA-registered disinfectants and sanitizers as well as a variety of cleaning solutions, and even water, to a wide variety of surfaces. With minimal effort, it quickly delivers an ultra-fine mist of 60-80 micron droplets to targeted surfaces including hard-to-reach corners and crevices. Plus, it provides significantly better and faster coverage than traditional cleaning methods. Its 50-foot hose and lightweight spray gun gives users a 360° 100-foot-wide radius without causing unnecessary fatigue.
